

ADVANTAGES

- Equipment certified to ATEX, in compliance with NFPA
- Maintenance-free
- Different sizes available
- Passive explosion protection system
- Safe venting on outdoor installations
- Simple construction, highly reliable

Application	- Can be used on all dry dust applications which require explosion protection - For metal and organic explosive dusts - Also applicable for high-vacuum applications
Installation Options	- Explosion vent panels can be configured to all Gold Series dry dust collectors (outdoor installation) - This component allows venting into a safe outside area - Vent panels will be factory installed
Comment	- Damaged vent panels must be replaced after an incident of explosion - We supply equipment which is compliant according to regional regulation such as ATEX or NFPA
